

WARRANTIES

All doors manufactured by **Baillargeon Doors Inc.** are warranted against any material and manufacturing defect that could render them unfit for use.

This warranty does not cover doors that are stored or installed in a damp place, or in a freshly plastered building, or subjected to extreme heat, dryness or humidity. The moisture level of the air should be between **25%** and **55%**. (Reference: © 2009, AWI, AWMAC, WI – AWS – 1st Edition, October 1, 2009)

During finishing, the extremities of the door (top and bottom) should receive the same treatment as the faces and edges, or a minimum of 2 coats to prevent the absorption of moisture or exposure to extreme dryness. Natural variations in the color and texture of the wood are not considered to be a defect.

The finish must be completely made in the factory by Baillargeon. Doors exceeding **36" (914 mm)** in width and/or **84" (2134 mm)** in height are guaranteed against warping in excess of **1/4" (6 mm)** on the concave section for dimensions of **42" x 84" (1067 mm x 2134 mm)**.

Any claim under this warranty must be made with the manufacturer in writing as soon as the problem is detected. In the case of a defect reasonably visible during the inspection of each door when received from the manufacturer, notice must be given within **10 days** and before the door is installed or treated.

The manufacturer cannot be held responsible for doors repaired or replaced without its written consent. The manufacturer's responsibility under this warranty is limited to the replacement or repair of the defective door or parts. Doors must have aged at least **12 months** before replacement.

This warranty does not cover installation and finishing. Factory finishes only are warranted, and installation is not covered. Cleaning maintenance must be done with a soft moist cloth and mild soap.

THIS WARRANTY DOES NOT COVER

- | Doors whose exposed surfaces, including the top and bottom, were not treated
- | The appearance of doors finished on-site
- | The appearance of the doors covered with laminate or either high-gloss finish or dark finish;
- | Doors having a different type of plywood or finish on each side
- | Doors with an opening for glass, screen or hardware having vertical or horizontal mullions that are under **5" (127 mm)**
- | Doors with an opening covering more than **40%** of their surface or more than half of the height of the door
- | Doors with openings for glass, screen or hardware that are less than **5" (127 mm)** apart
- | Doors whose hardware or poor installation reduces their resistance and/or that do not open freely
- | Doors whose dimensions and/or structure have been modified without authorization, as well as those that are not pre-drilled
- | Doors whose faces are exposed to different temperatures and moisture conditions on opposite sides
- | Non-respect of maintenance procedures
- | Doors exposed to abusive impacts
- | Molded doors with openings for glass and panels that were not sealed by Baillargeon
