

THE FINISH THAT LIVES UP TO ITS NAME...

At Baillargeon Doors our exclusive Integrity finish is built right into our manufacturing process. We have just the finish for any kind of door you need.

integrity

Baillargeon's Finishing System

Hand stained for richer wood grain. A new level of transparency. A totally natural look.

integrity plus

Baillargeon's Water-based Finish

Our water-based, low-VOC finish—pure ingredients for pure beauty. A tightly controlled process and exacting attention to detail. The same durability. The environmentally conscious choice.

Eligibility conditions:

- Clear varnish available for White Birch, Maple, White Oak, White Ash with customer's approval. Other species available on required color development.
- Water based stain available on all species. Color development required.
- For lead time: Allow one week more than for our **Integrity** system.
- Minimum of 50 doors.

Because we've been building integrity into our approach since 1985.

Inspiration in Colors

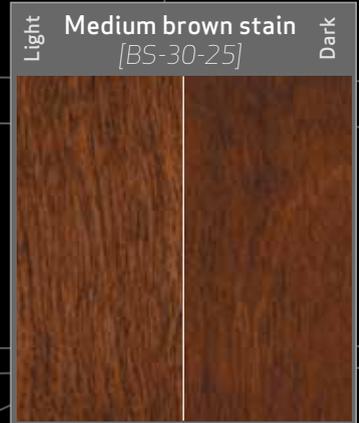

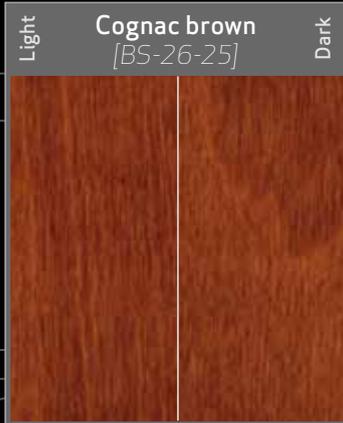

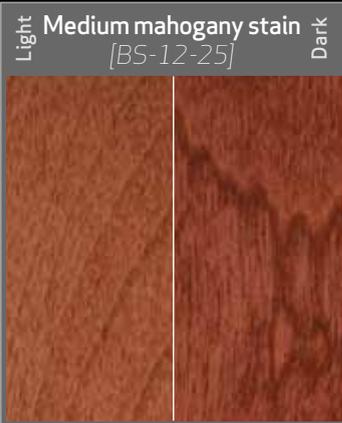

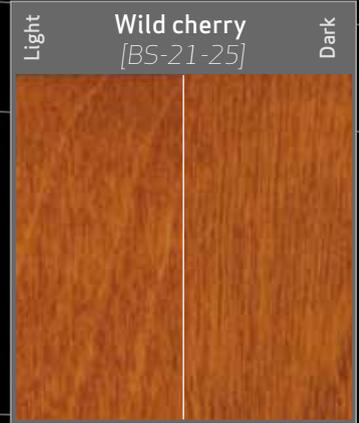

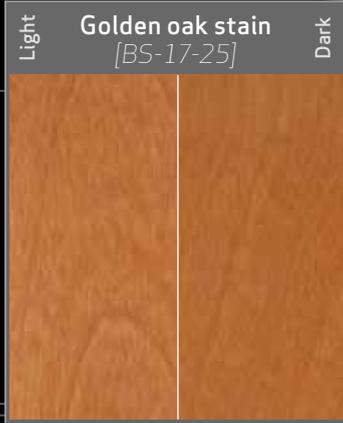

Baillargeon

Wood Door Manufacturer

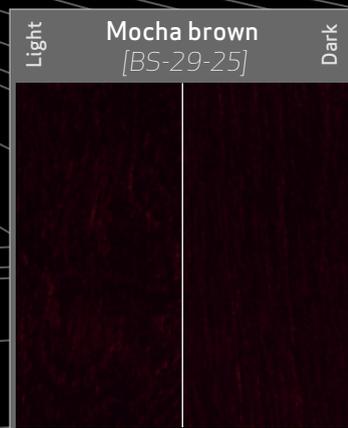

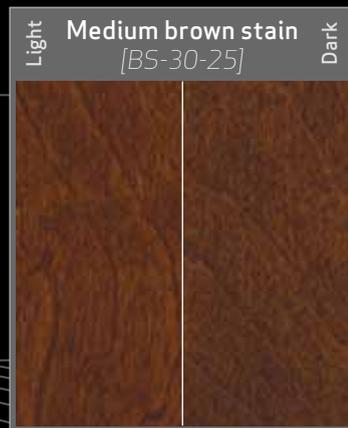

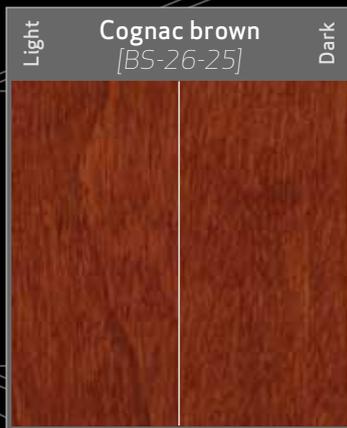

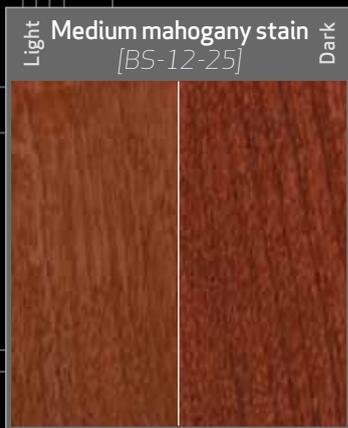

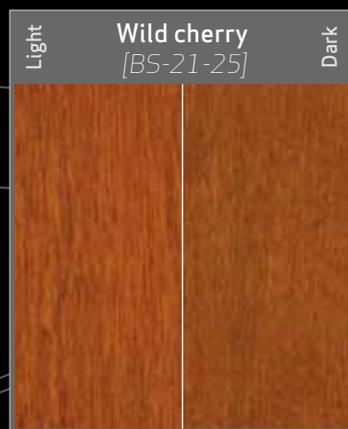

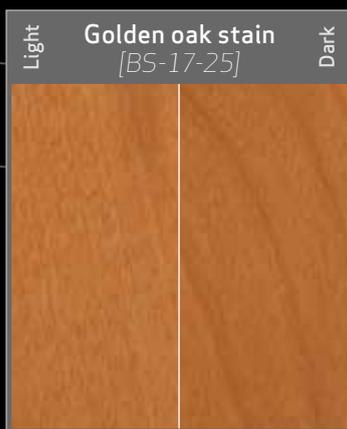

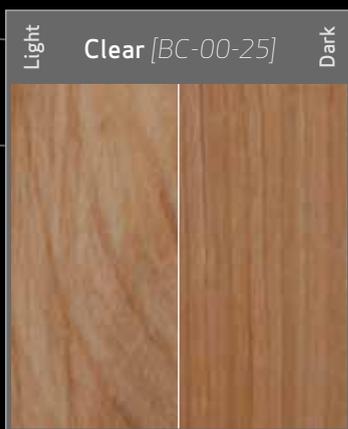

White birch rotary cut

Wide, creamy white sapwood with pale brown heartwood.
Straight grain with fine, uniform texture.

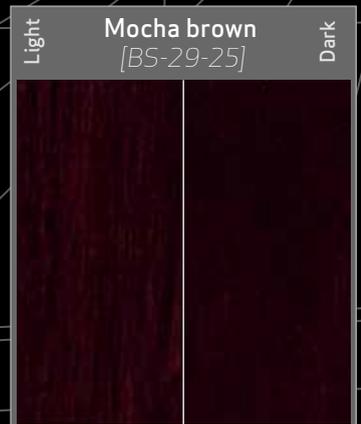

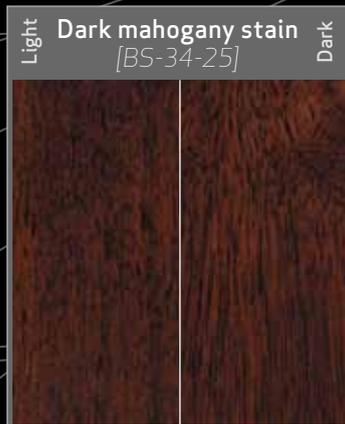

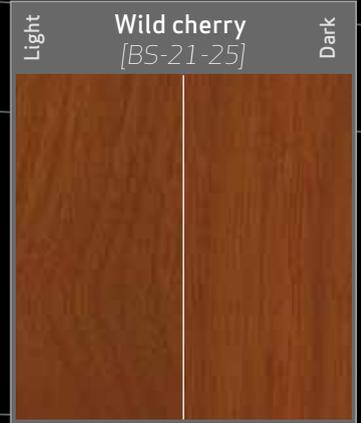

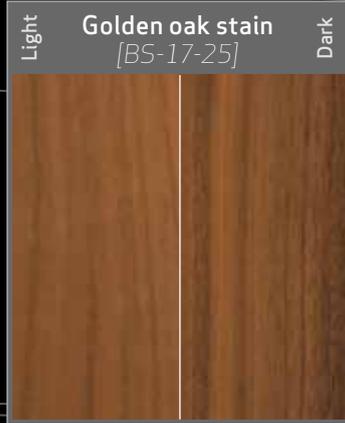

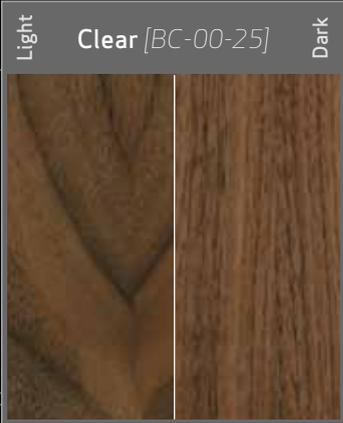

Natural birch rotary cut

Noticeable color and grain variations.
May contain a combination of creamy white sapwood and pale brown heartwood.
Straight grain, uniform texture.

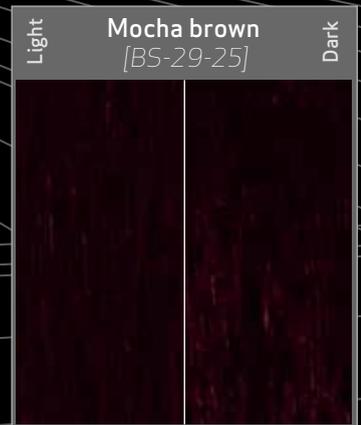

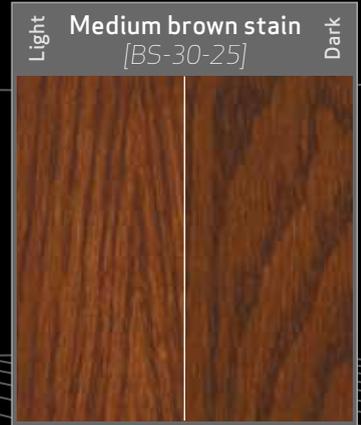

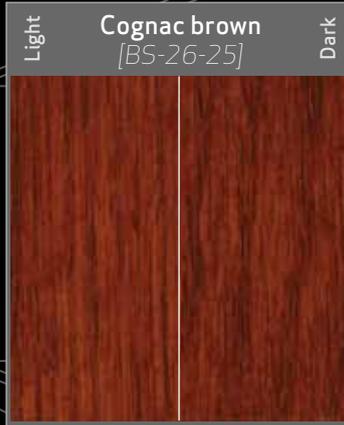

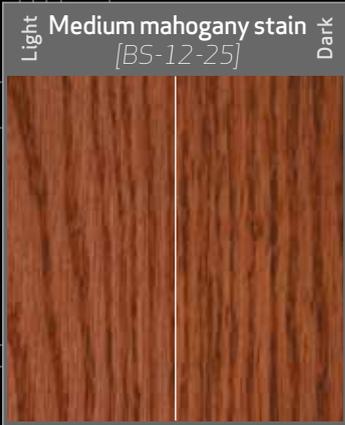

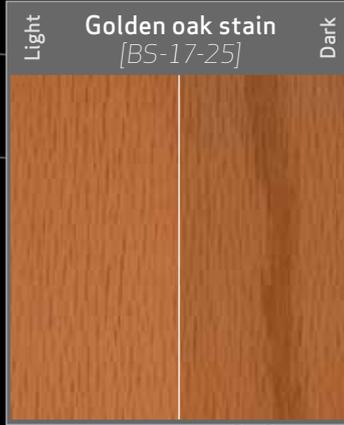

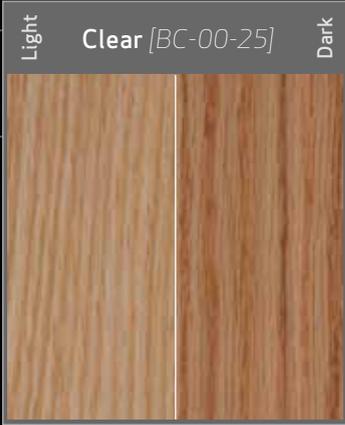

Walnut flat cut

Rich dark brown to purplish-black heartwood, mostly straight grain with an occasional wavy or curly pattern and a rather coarse texture.

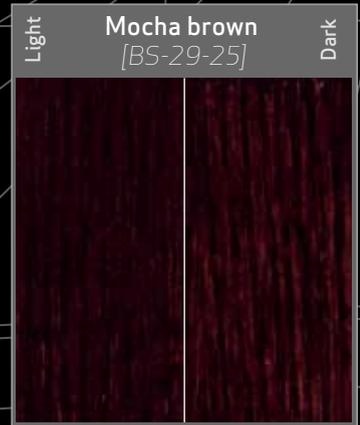

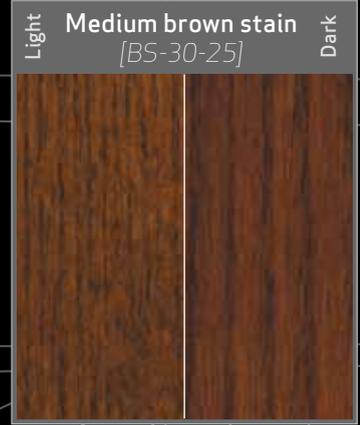

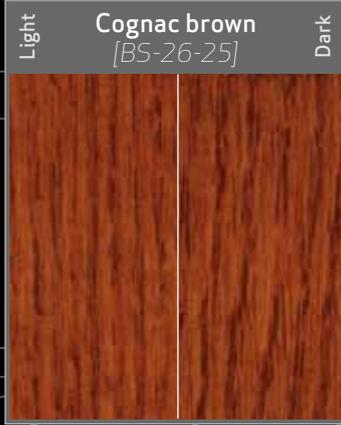

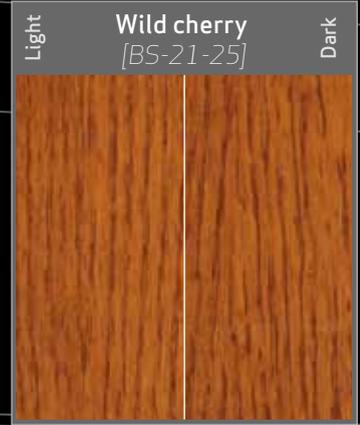

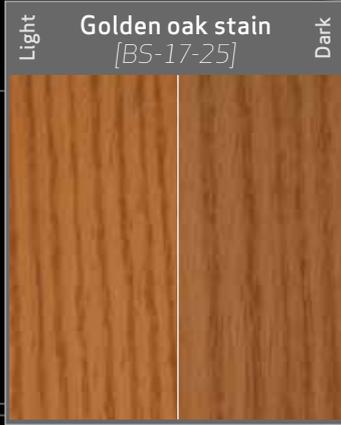

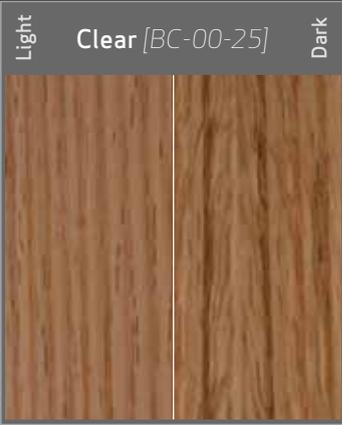

Red oak flat cut

The heartwood resembles other oaks with a biscuit to pink color, but has a reddish tinge. Mostly straight grain and coarse texture, with a less attractive figure than white oak due to smaller rays.

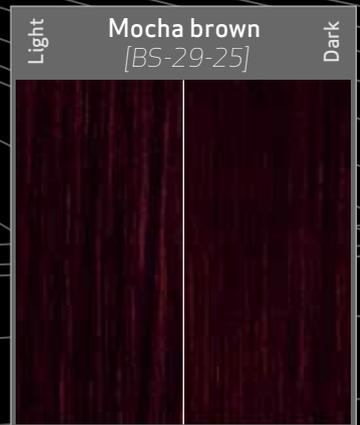

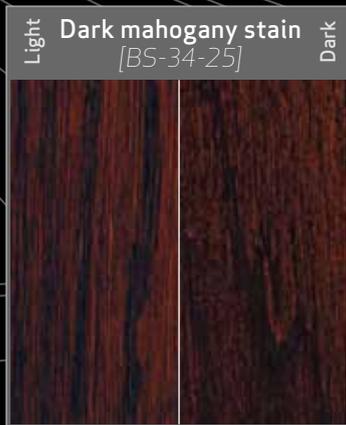

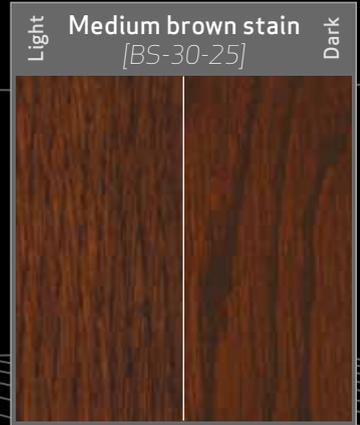

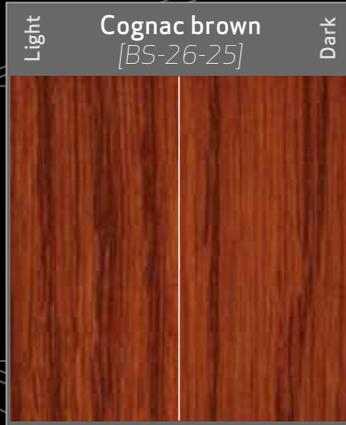

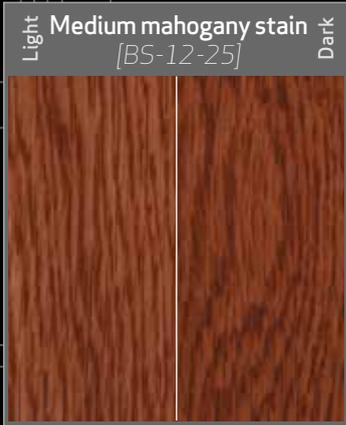

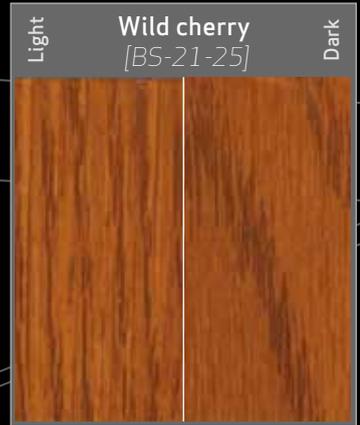

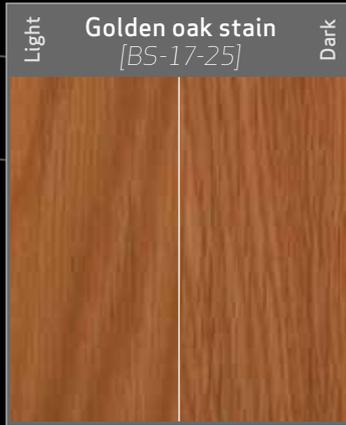

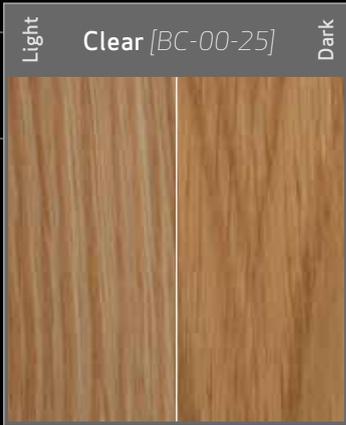

Red oak rift cut

The heartwood resembles other oaks with a biscuit to pink color, but has a reddish tinge.
Narrow striped pattern grain.

White oak flat cut

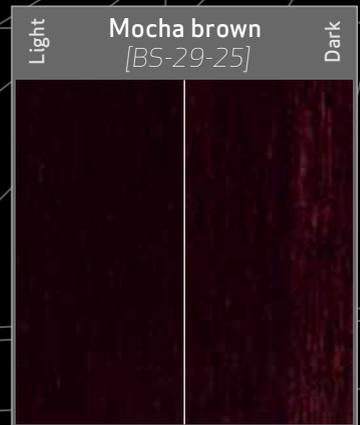

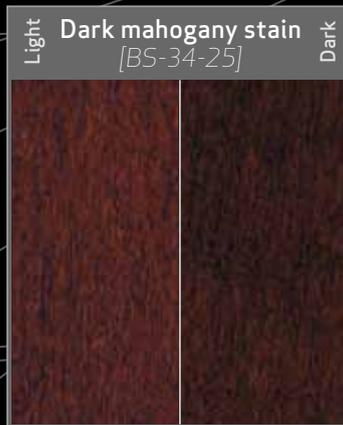

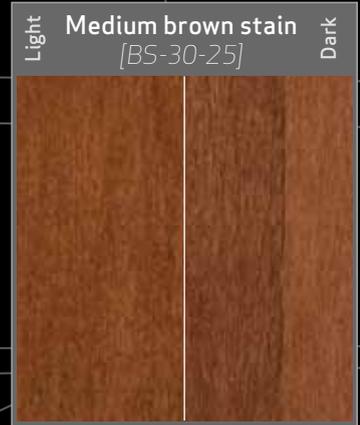

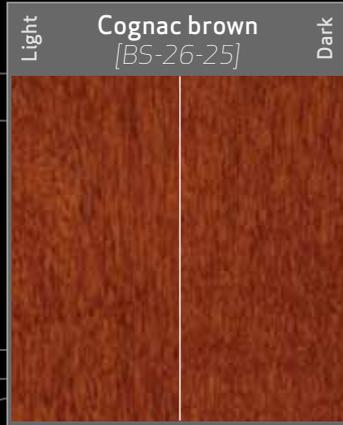

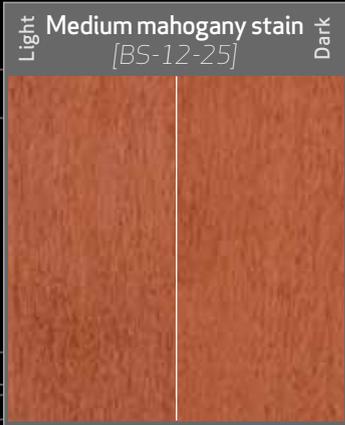

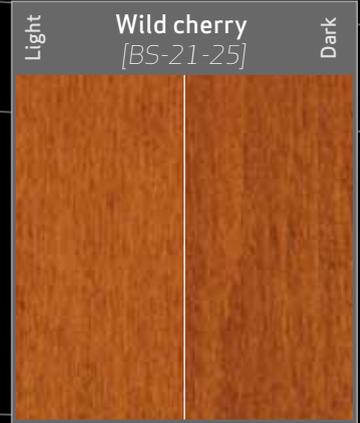

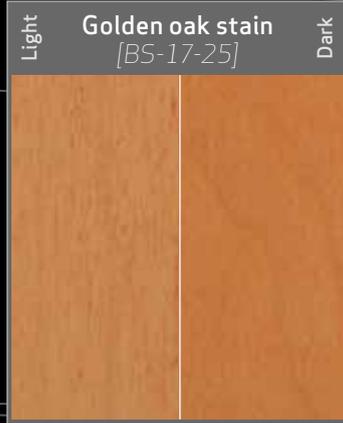

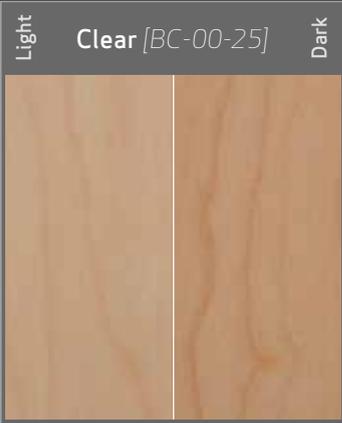

Varies in color from pale yellow-brown to biscuit with a pinkish tint, similar to European oak.
Straight grain, with the characteristic silver grain on quartered material.
Medium to coarse texture.

White maple flat cut

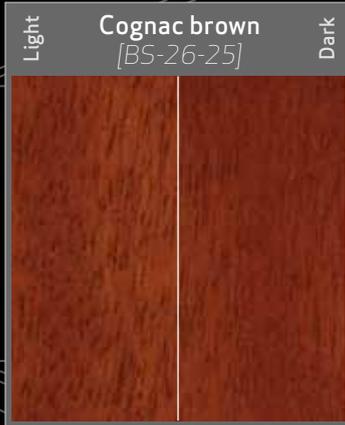

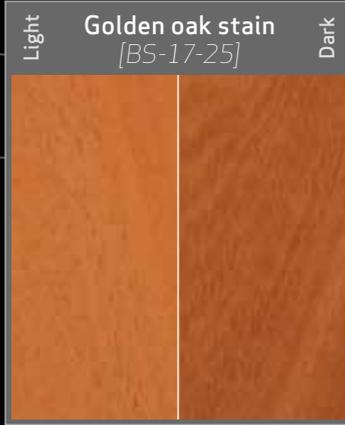

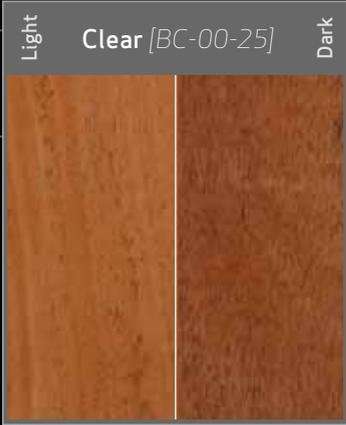

Creamy white with a reddish tinge.

Usually a straight grained wood but sometimes has a curly or wavy pattern.
Fine brown lines give an attractive growth ring figure on plain sawn surfaces.
Fine, even texture.

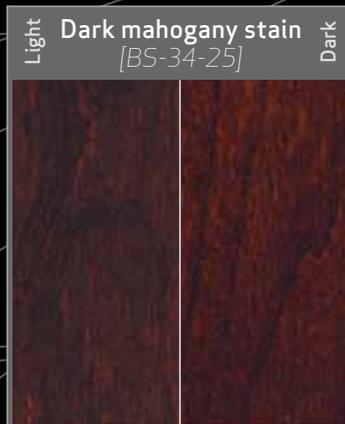

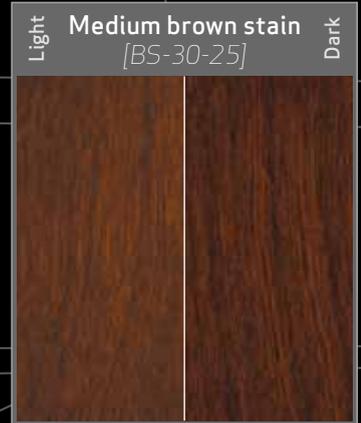

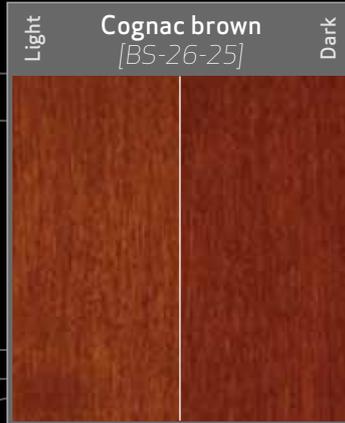

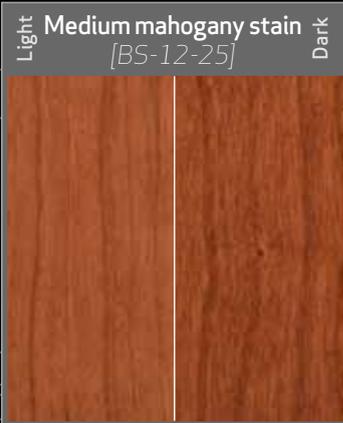

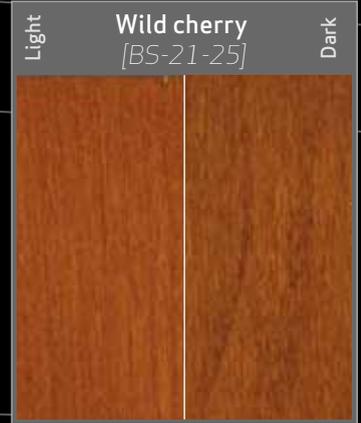

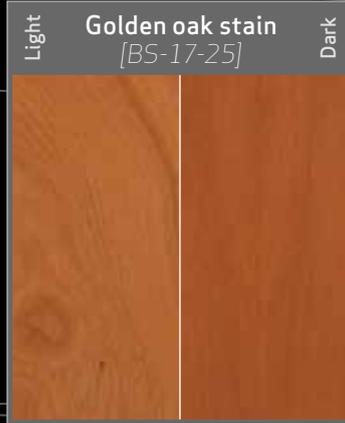

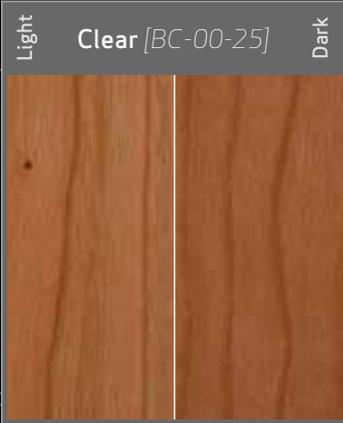

Mahogany flat cut

Heartwood varies from light to deep reddish-brown.
Straight to interlocking grain, medium to moderately coarse texture.

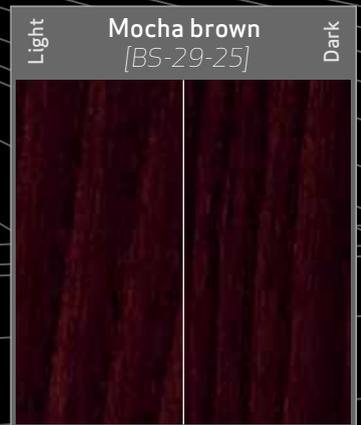

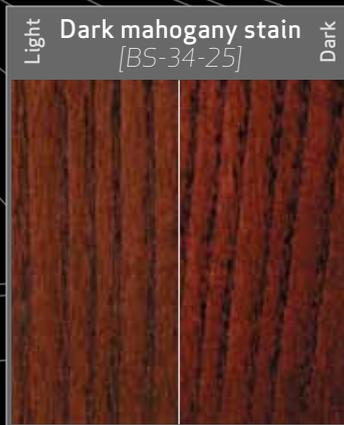

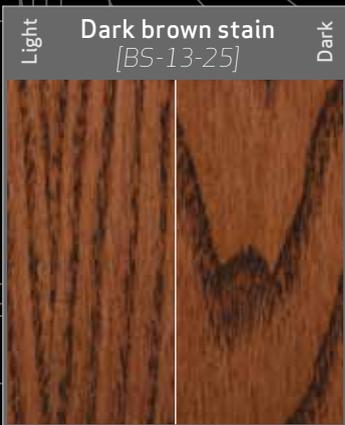

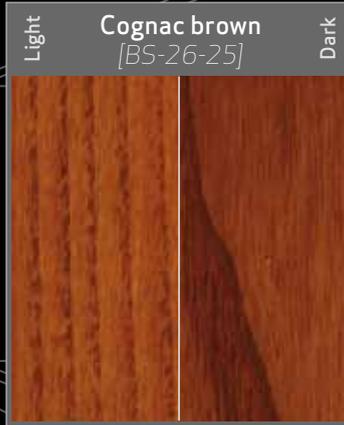

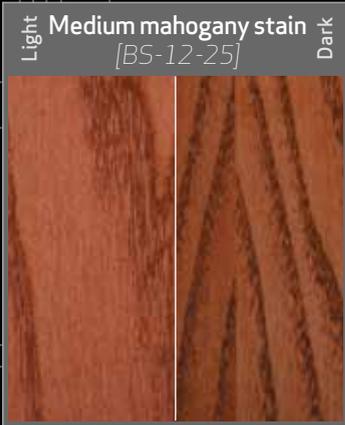

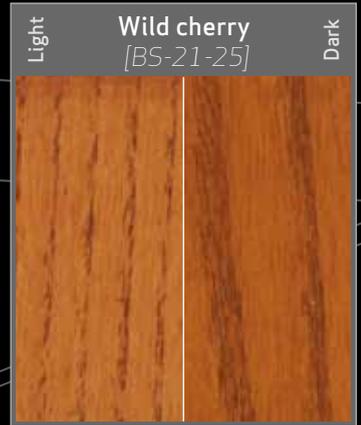

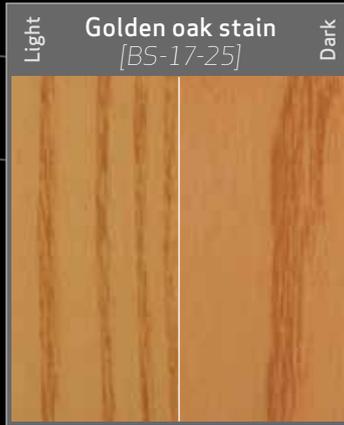

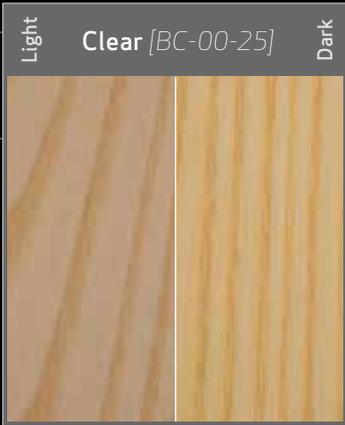

Cherry flat cut

Heartwood varies from rich red to reddish-brown, with a fine, straight, close grain, narrow brown pith flecks, small gum pockets, and a smooth texture.

White ash flat cut

Heartwood is grey-brown, sometimes tinged with red.
Grain is generally straight and coarse with an even texture.

DOORS THAT INSPIRE

Adaptability. Creativity. Precision. To fit the realities and requirements of your construction and renovation projects—every step of the way.

| Architectural Series

| Institutional Series

| Commercial Series

| Fire doors

And everything else that no one else can do.

Baillargeon's custom approach opens up a world of potential. Let us inspire you!

SPECIFICATIONS

The colors in the sample photos may differ from those of the actual doors due to variations during printing and to natural variations within a given wood species.

The examples provided illustrate the natural variations between light and dark shades of a single wood species.

Approximately 25% gloss with varnish or stain.

Door face thickness is 0.68 mm +/- 0.10 mm.

Our products meet or exceed WDMA, sections 5 and 9—AWS, and all other industry standards. The finishing process is environmentally friendly.
