Interior Door Slab Measurements

4. Door Handing & Swing

HOW TO MEASURE

Whether you are measuring for the framing of a new interior door or looking to replace your existing door with one the same size, the process is pretty simple. In terms of style, the possibilities are bountiful for standard and custom designs; getting the perfect fit depends on careful measurement. Double checking your measurements at least the first few times can save you time and energy later.

Interior Passage Door Specifications Required

- 1** Door slab size is determined by measuring the rough opening, less 2" in height and width. Choose from the standard size that is closest to this measurement.
OR Determine the slab size and add 2" to the width and height, to get a rough opening measurement.
- 2** Measure the location of the hinges, always starting at the top of the door and measuring down to the top of each hinge (excluding the pin).
- 3** Measure the lock position for drilling, from the top of the door slab to the centre of the lock diameter. Standard heights are 40" or 44".
- 4** Determine door swing/handing for accurate machining and correct mounting of hinges and hardware.

ROUGH OPENING SIZE:

FOR INTERIOR KNOCKDOWN AND PREHUNG DOORS

Rough opening measurements are taken from the inside of the framing lumber, both horizontally and vertically. It is easiest to do this when there is no door installed.

If the door unit occupies the current rough opening and is being replaced, the rough opening measurement can also be taken by removing any necessary mouldings which may be preventing you from seeing the actual lumber frame surrounding the door.

MOULDED PANEL

Madero is proud to partner with Masonite® to provide moulded panel doors that have been transforming interiors for over 80 years. Together we are relentlessly committed to delivering product, service and design innovations which will enhance the beauty and functionality of your home.

Quality Is Our Standard

Moulded panel doors from Masonite are more durable and resist warping, shrinking and cracking better than solid wood doors. These beautifully engineered doors are available in a smooth or textured woodgrain finish, with matching bifolds to suit any decor. They come in a wide range of widths and heights and are primed for easy finishing.

By-product wood chips and timber from sustainably managed forests are used at Masonite facilities, with a commitment to environmental excellence in every step of the door manufacturing process.

Emerald™ Hollow Core

- Perfect “green” solution for budget-minded customers.
- 1-3/8" thickness only; primed white and ready to paint.
- Contains pre-consumer recycled content and resource efficient materials.

hollow core 

Safe 'N Sound® Solid Core

- For reduced sound transmission; ideal for bathrooms and bedrooms where privacy and safety are a concern.
- 1-3/8" and 1-3/4" thickness available in most moulded panel designs and sizes.
- 20 minute fire rating available in 1-3/4" thickness only.
- Offers heft and feel of solid wood; primed white and ready to paint.
- Manufactured with DorCor™, a low density fiberboard made from wheat straw (annually renewable, agricultural, wheat by-product).

safe'n sound
SOLID CORE MOULDED PANEL DOORS

Safe 'N Sound® Emerald™ Solid Core

- Ideal product for allergen-sensitive customers requiring optimal air quality.
- 1-3/8" and 1-3/4" thickness available in most moulded panel designs and sizes.
- 20 minute fire rating available in 1-3/4" thickness only.
- Offers heft and feel of solid wood; primed white and ready to paint.
- Forest Stewardship Council (FSC) certified wood, containing environmentally preferred products: low emissions adhesives and sealants, extremely low VOC emissions, and no added urea-formaldehyde (NAUF).

STILE & RAIL

Madero offers a complete line of interior stile and rail wood doors to meet any architectural or design requirement. The wood panel designs include traditional and contemporary styles, from a variety of sustainably harvested wood species. Add warmth and richness to any room with the look and feel of natural solid hardwood veneer – constructed to withstand the daily rigors of family life.

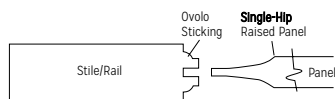

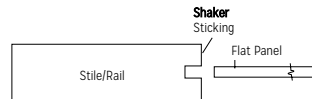

Woodport Doors is a seasoned, quality supplier of authentic wood doors, located near the rustic forest region of Wisconsin's North Woods. This area has a long history of the woodworking trade, and they are proud to continue the craft. Skilled men and women build stile and rail wood doors as beautiful as they are strong. Make your dream door a reality from a wide product selection – we're confident you'll find the perfect style for your home.

Masonite is known worldwide for innovation, quality products, exceptional customer service and a commitment to excellence. Over 80 years of dedication to innovation, technical advancements and customers make Masonite the brand that builders, remodelers and consumers choose when creating homes of distinction. Masonite is continually creating new and innovative products that will make your home more beautiful, valuable, and enjoyable.

“A room is an enclosure of space and time for a specific purpose.”

FRENCH DOORS

French doors are a smart choice for adding privacy to a study or home office, without robbing it of valuable lighting. In addition to keeping light flowing into the room, they provide a secure view into your home. The need to hold private conversations or finish work at home may isolate you from your family. By using French doors, you won't be secluded behind a solid wood door, and they serve as a buffer to various household noises. Choose from traditional designs with nostalgic charm, or modern panel lite styles for a fresh new look. Endless custom glass options are available to suit every taste.

AMERICAN WALNUT

Natural, warm woods are all the talk these days and walnut may be the perfect candidate. Bridging the gap between old and new, the honey and caramel shades of walnut create visual texture, adding warmth and elegance to any living space. Pair with bronze finished hardware for a step back in time, or with polished or brushed stainless steel for a cutting edge, modern look. Available in 1-3/8" or 1-3/4" thickness.

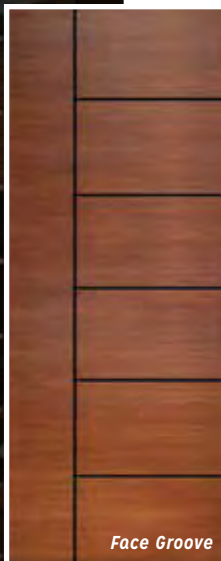

As shown: quarter sliced, book matched, horizontal grain walnut with hand rubbed custom stain.

Flush

Flush

A timeless, uninterrupted look places focus on the natural beauty of the wood, while showcasing the hardware and surrounding decor.

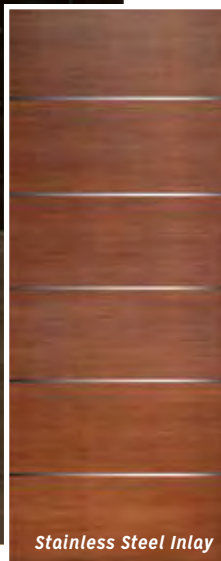

Face Groove

Face Groove

CNC machined custom face grooves can be created in any shape or pattern. Grooves can be left raw or painted in any colour to match a home's interior style.

Stainless Steel Inlays

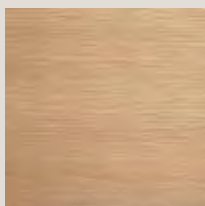

Solid stainless steel inlays provide a modern, architectural look while matching the hardware throughout the home.

Stainless Steel Inlay

Options

- Pre-machining to match any hardware and hinge configuration
- 20, 45, 60, and 90 minute fire rating available
- Plastic wrapping for protection during construction
- Matching flat jambs, rabbeted jambs or casing-integrated jambs for a consistent and polished finish

White Oak Rift Cut

Looking for a lighter alternative? Horizontal grain rift-cut white oak is a great option while still achieving a modern but timeless feel.

PORTES de BOIS
WOODDOORS

20 minute fire rated horizontal grain mahogany suite entry door with stainless steel inlays, viewer, and Etek Stuttgart lever paired with square rose and Neos deadbolt in Polished Chrome

Wood Species

Rotary cut, rift cut, quarter or plain slice. Book matched, slip matched, random matched, and more. Nearly any wood species is available in any cut, match, and stain color. From reclaimed African hardwoods to tobacco stained white birch from the sustainably harvested forests of Canada, nearly any species is available. The following is a list of the standard veneers found within the realms of Canadian design.

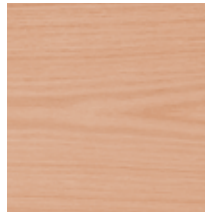

White Birch

Natural Birch

Walnut

TYPICAL APPLICATIONS

Double Door System

There are two standard mounting systems for interior double doors, available in inswing or outswing.

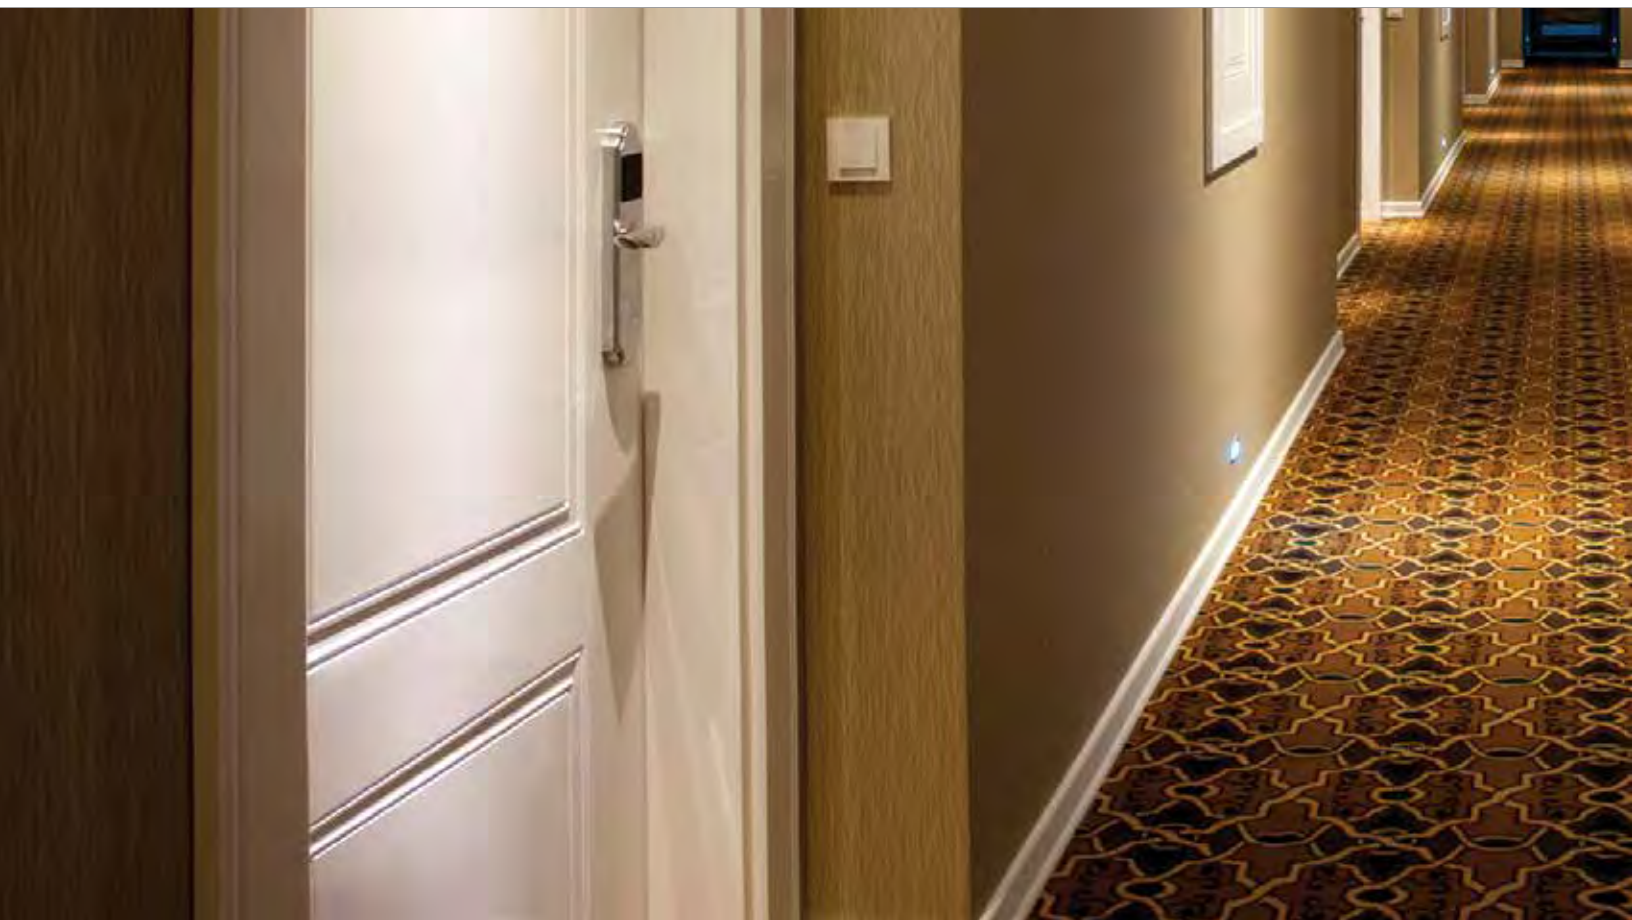

One Door Active →

- Locked door secured with flush bolts, mounted top and bottom to edge of door
- Hardware installed in active door only, on site

← Both Doors Active

- Standard roller catch mounted in the top of each door
- Hardware installed in both doors, on site

FIRE RATED FRAME OPTIONS

Madero offers the best in door components for the ultimate finished look. Choose a matching frame to complement your new door, made of primed finger joint pine, smooth white or textured woodgrain composite, or galvanized steel.

When safety standards are a priority, choose fire rated doors and frames. Madero's interior door product line features the standard 20 minute Warnock Hersey fire rating, with optional 45, 60, and 90 minute ratings available. These materials can withstand extreme temperatures and keep what's inside safe.

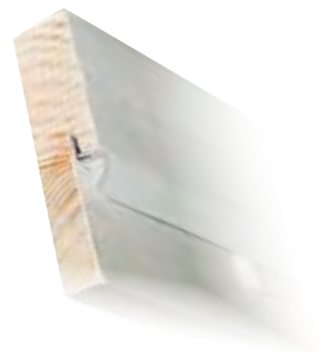

Intertek

20 Minute Fire Rated Finger joint Pine Frame (primed)

Primed, kiln-dried fingerjointed pine frames provide beauty and strength with a Warnock Hersey certified 20 minute fire rating. They are suitable for interior or exterior use when painted or stained.

- Available up to 8-7/8" jamb depth
- Available with or without kerf application

20 Minute Fire Rated Composite Frame

Madero's unique composite jamb product offers built-in advantages that are unmatched in the door industry. Our maintenance-free product means less work for you and longer life for the entry unit. Composite frames are very strong, with superior screw holding power and a tough exterior finish. Available in both smooth white and textured woodgrain finishes, these frames are designed to coordinate with any color and style of door.

- Available in 4-9/16", 6-9/16" or 8-9/16" jamb depths only
- Prefinished Smooth White can be painted
- Textured Woodgrain requires stain or paint

90 Minute Fire Rated Steel Frame (20 gauge)

Steel frames provide additional security as they are strong and durable, with a Warnock Hersey certified 90 minute fire rating. They are suitable for a variety of applications including welded, expandable and drywall anchored frames. Galvanized steel frames will accept paint, and require minimal maintenance.

- Available up to 8-5/8" jamb depth

“The essence of taste is suitability.”

DOOR MOUNTING SYSTEMS

Madero is pleased to offer several unique mounting styles for interior doors to give your room visual impact or make the most efficient use of space. We have sourced the best hardware suppliers in the industry to ensure quality, selection and value to suit your budget and interior decor style.

Barn Door Track System

This classic mounting style has recently surged in popularity due to its dramatic visual appeal and simplicity of operation. Reminiscent of barn door functionality from the previous century, new design hardware is bringing more impact to large open spaces that accommodate a wide door opening. Architectural door pulls complete the dynamic look with clean, bold lines.

Bypass Door System

Bypass doors give flexible, space saving access to closets or rooms and offer a timeless look with contemporary appeal. The mounting hardware allows one door to pass in front of, or behind, another door. They hang in a staggered line and slide back and forth on a quiet, smooth gliding track. Perfect for a built-in closet, they allow you access to both sides of the wardrobe.

Pocket Door System

Pocket door hardware allows doors to be supported from a horizontal overhead rail, for concealment of the door into an adjacent wall. The space saving advantages of this system have been in use for over a century, with recent advancements for cost-effective solutions and an easily serviceable system.
