

The grip of our oval shape conforms to the natural contour of one's hand, defining the standard in comfort for the user. The design is complimented by the oval shaped mounting posts. The pulls are available in regular and full height lengths. The push bar features oval tubing practically positioned to expose the broad pushing surface. Available in two cross section sizes, the oval pulls and push bars are the most ergonomically correct door hardware.

**OvalTek™**  
with true oval grip
