The Code handle for doors

Features

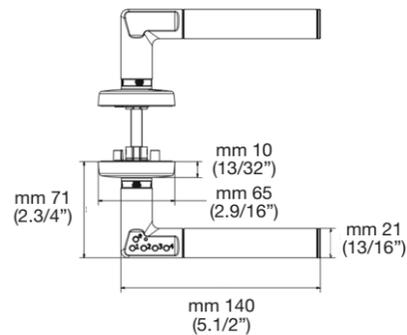

- A system to use for interior doors only
- Product is patented
- Material: brushed stainless steel and satin chrome zinc alloy for neutral and versatile aesthetic that is compatible with any space
- Powered by two lithium batteries inserted in the handle itself. Power will allow for approximately 100.000 openings. The system guarantees no memory loss in case of loss of power or during battery change
- Easy assembly: it does not require any wiring or special connections
- Includes special acoustic and optical alarm systems for easy and secure usage
- Available for both right and left opening, please specify
- No need for a Locksmith to change the lock
- No Building Maintenance necessary
- Need to change only the code

How it works

- The locking mechanism is operated with five buttons
- Four buttons to press a four-to six digits code to unlock and one button to lock
- Green light flashes and a sound is heard when the buttons are pressed for unlocking
- Red light flashes and a sound is heard when locking.
- Administration code and user code is programmed at installation, Can be changed unlimitedly
- Unique reset function (patent pending)
- If wrong code is pressed five times the handle is blocked for three minutes
- Free swing from the outside when locked, always possible to open with the handle from the inside.
- Indication for battery change
- The code is constant at voltage drop or battery change
- Batteries included
- Instructions on how to program are included in box
