High grade protective coating

Quality Certificate

We certify that the treatment applied as a coating to the surface of our products and known as **ZIRTANIO** is guaranteed for **30 years***.

This treatment has passed the following tests:

- Resistance to salt spray (1500 hours)
conforming to standard ISO 9227 ASTM B117 DIN 50021
- Resistance to solvents conforming to standard MFK
- Resistance to specific anti-calcareous products
- Unlimited resistance to muriatic acid
- Resistance to alteration caused by strong light conforming to standard UNI 9397

For cleaning we advise using a cloth dampened with alcohol.

* We disclaim all responsibility if there is negligent or inappropriate use of products.

The door handle and its accessories, which have become part of the furnishing of the home, are subject to daily use, and consequently to natural wear and tear. In addition, certain climatic conditions, or atmospheric agents such as salt-air or high humidity, or use in detrimental conditions can accelerate the ageing process, damaging the protective coating and causing corrosion with un-aesthetic results.

Thanks to the **Zirtanio** treatment, applied to the surface of the products, **Assa Abloy Italia** guarantees protection for **30 years**.

This finish is applied on request.

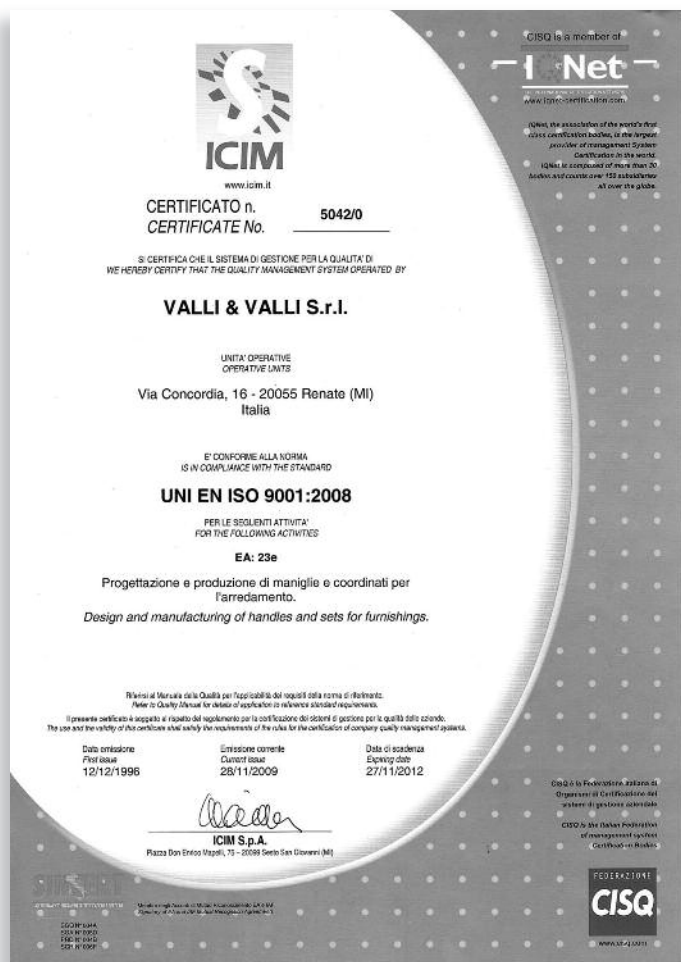

For any further information or explanation you may require, please feel free to contact our offices.

V&V Price list 2011

Sales terms

General sales terms and conditions

This gross price list cancels and replaces all previous ones.

1 - Prices

Prices are quoted in Euro per UNIT (or PAIRS in the case of door handles and door knobs).

The seller reserves the right to increase the prices in this price list at any time, informing the customers and/or whoever has placed the order at that time. Orders which have arrived at the seller at a date previous to an increase in price will be processed using this price list or by the price list valid before the increase in the case of requests for delivery within a maximum of two months from the date on which the order was placed. In those cases where the customer does not accept the new price, cancellation must be made in writing within 8 days of being informed of the increase, and the seller will consequently not be obliged to deliver the order. In the case of orders delivered before an increase in price, the present price list or the price list valid at the time delivery is made, will be used. Goods are considered delivered when consigned to the company lorry or shipping agent.

2 - Orders

The quantities ordered must conform to the packing quantities shown in the price list. Non-conforming quantities, if accepted will be subject to a **25%** increase on the price indicated in our price list. Non-conforming quantities will be automatically rounded up to the packaging quantities. The minimum shippable value is Euro **1.500** nett. Exceptionally, orders of lower value may be accepted, but they will incur a fixed additional cost of Euro **52** in addition to any other transport costs included in the invoice. Modifications or cancellation of orders will not be accepted, except where provision is made in Point 1 above.

3 - Delivery

Delivery dates are not to be considered binding. Possible delays in shipping do not entitle compensation.

4 - Payment

Payment must be made to the registered offices of the seller, or if such provision is made, to the bank or place indicated by the seller, within the agreed terms. All bank costs involved for transfers covering our invoices must be completely paid by the customer. Interests as expected by the law as per D.L. 231/02 will be charged for delayed payment.

5 - Shipping

All goods travel at the risk and responsibility of the consignee. The consignee is responsible, at his own expense, for checking the goods on arrival, and for informing the carrier of damage, missing goods, or theft. Goods are considered delivered when consigned to the company lorry or shipping agent. Delivery is ex-works for orders for less than Euro 2.500. Orders for over Euro 2.500 are delivered either Free Italian Border, Free Milan Airport, or FOB Genoa. Concerning the meaning given to the description of the goods returned indicated in this point and the ones that can be indicated in our orders' confirmations, the specifications indicated by "Incoterms 2000" are valid.

6 - Claims

All claims must be made in writing by the consignee within 8 days from the arrival of the goods, after which time no claim will be accepted. Product defects or shipping errors do not give entitlement to compensation by the seller for consequent damage. Provision is made solely for the substitution and/or completion of defective goods where responsibility lies with the seller, and a claim has been filed by the consignee within the allotted time.

7 - Products

Taking into consideration market demand, we reserve the right to modify products or interrupt or suspend the production of one or more articles at any time without prior notice. Dimensions shown in this price list are for reference purposes only.

8 - Disputes

For any dispute concerning the interpretation, execution, or resolution of sales or supplies, or relating to the conditions above, or orders relating to the aforementioned price list, the competent court will be the Court of Bologna, Italy.

General sales terms and conditions

9 - Warnings

Door handles and their accessories are designed to open and close doors.

They represent a complementary element of the door, together with the frame, hinges, door panel, lock and cylinder. Opening and closing a door with a handle requires certain actions, such as opening a security bolt. Only in certain cases, such as on emergency doors, the handle serves the function of working the lock by lowering or pushing it.

Window handles too are to be considered only a complementary part of the window.

It is normally the opening system of the window which determines the hardware required and consequently the mechanism required for the working of the window handle. Door handles, pull handles and window handles are often incorrectly used, damaging the product and the quality standard defined by the producer.

Common errors include:

The use of the handle as a support or hook for objects which may be excessively heavy.

The use of the handle as a plaything by children.

The use of the handle as a doorstop against the wall.

V&V products do not require excessive maintenance.

For care and cleaning, except in those cases where a specific product is recommended for certain finishes, V&V recommends the use of just a soft dry cloth. To ensure correct fixing, the instructions contained in the box should be followed. If necessary, consult the retailer or specialised personnel.

V&V recommends the use of doorstops fixed to the floor or the wall close to the door or its handle.

On all products with a grub screw V&V recommends the use of a retaining compound. It is also advisable to check the position and tightness of all fixing elements at regular intervals. The user/purchaser of the product should ask the retailer for instructions regarding the correct fixing, care and maintenance of the product. V&V products are subject to a continual process of development and updating, and production is constantly monitored by Valli&Valli Quality Assurance.

Most V&V products are “tools” for opening and closing doors and windows. Inevitably, as with all artefacts, depending on the material of which they are made and where they are used, they are subject to wear and the passage of time. Brass, an alloy subject to oxidation, has to be covered with a protective coating if its appearance is to remain unchanged over time.

Care should be taken during use and maintenance, as improper use or poor maintenance could damage the protective coating, permitting corrosion and consequently causing an anti-aesthetic appearance. Stainless steel is generally considered to be indestructible. However, even this material can show the occasional scratch or spot of rust. Such rust-spots are so-called “surface rust”, and can be removed using an appropriate cleaner, available from specialised retailers. The manufacturer cannot be held responsible for damage due to normal wear and tear, incorrect treatment, fixing or maintenance or non-observance of the warnings above.

Anticato/Antique: finish is performed manually therefore variations in colour tone and shading may occur.

Murano glass: the inevitable imperfections are due to the handles being made by hand.

Our production is subject to constant improvements. We therefore reserve the right to alter product specifications without prior notice.
