ANTI-GRAFFITI POWDER COATED OVER GALVANNEAL STEEL

GSS

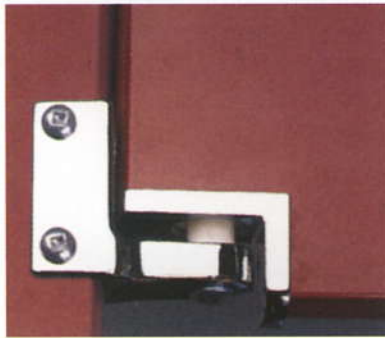

GENERAL STORAGE SYSTEMS

FEATURES AND BENEFITS

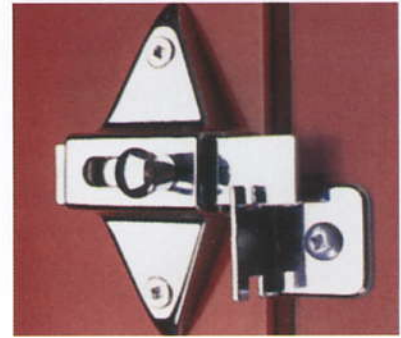

GSS hinges are chrome plated to a mirror bright finish with gently rounded edges.

The **self-closing hinge** can be set to door closing angles of 0°, 10°, 20°, or 30°. A low friction nylon pin and precision molded bushing provide a smooth and **maintenance free** operation.

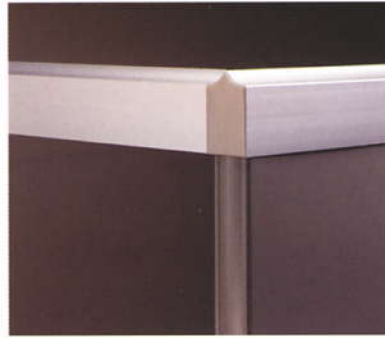

GSS has the **unique advantage** that pilasters can be **reversed top and bottom or mounted on the left or right hand side**. No matter how it is installed, the door/pilaster gap is minimized.

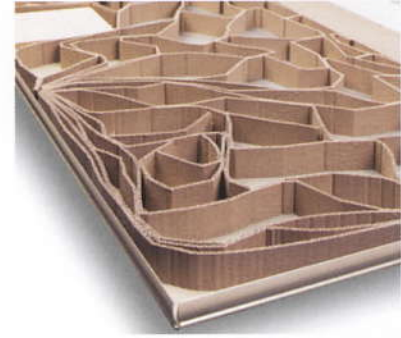

All GSS doors are locked with a **maintenance free slide latch**. The chrome plated latch blends perfectly with contemporary architecture. The design of the bumpers allow for **emergency access** to all stalls.

The edges of **GSS** panels, doors and pilasters are **snap locked together** along the entire length for a smooth double thick edge that resists damage or separation and provides a hygienic surface. **Tough impact resistance and rigidity** is achieved by brazing the corners of the doors, panels and pilasters for additional strength and by **laminating under pressure** the honeycomb core to both inside surfaces of the steel.

The headrail has a **unique cap style**, anti-grip shape made of extruded aluminum anodized bright silver. Safe but uninviting, it **provides privacy** without being obvious.

GSS has one of the **strongest door constructions** on the market. **Doors** have the standard honeycomb reinforcement. **PLUS** – a solid particle board reinforcement down the full length on the hinge side. **PLUS** – a solid piece of structural honeycomb. **PLUS** – a solid piece of particle board where the latch is located.

GSS TOILET COMPARTMENTS

- ✓ Constructed of galvalneal steel, laminated to a tough impact resistant, sound deadening honeycomb core sealed tight by continuous snap lock edges and reinforced by welded corners.
- ✓ Can be installed in all standard configurations, with a choice of three types of brackets, including stainless steel.
- ✓ Unique advantage of reversible pilasters, hinges and bumpers. A real benefit for adaptability during installations.

STYLES

EPIC - OVERHEAD BRACED

MEDALLION - FLOOR MOUNTED

CITATION - CEILING HUNG

EPIC - OVERHEAD BRACED

This is the toughest full service restroom installation designed for extremely heavy duty use. The **Epic** is braced along the top of the pilaster with a cap style aluminum headrail and at the foot of each pilaster with a recessed floor channel. It is our most popular compartment. The **Epic** provides outstanding performance for industries, public facilities and schools where maximum performance is required.

STOCKED BY MAJOR GSS DISTRIBUTORS

MEDALLION - FLOOR MOUNTED

When it comes to prestige locations, the choice is **Medallion**. These compartments are floor braced with a 12 gauge heavy duty channel for secure support at the pilaster. **Medallion** installations provide a clean, modern look complimenting design elements in office towers, clubs and other high quality structures and facilities.

CITATION - CEILING HUNG

Citation compartments seem to float on air. These stylistically pleasing compartments are ceiling braced with a 12 gauge heavy duty channel for secure support. **Citation** is ideal for applications where visual security and ease of cleaning are a top priority.

PRIVACY SCREENS

GSS Privacy Screens are available in three styles: Floor Mounted, Wall Mounted and Panel Post design. The materials provided are of the same standards as our toilet partitions.
