## COLLECTION SERIES

If you can dream it, we can build it. Madero's Collection Series Door Systems are crafted using only high quality components – designed with the consumer in mind.

Mechanically fastened units ensure your door system holds up to the climate – keeping the elements out, where they belong. Ranging from cost-efficient functionality to the most elegant and sophisticated entrances, the Collection Series door system provides lasting beauty and durability equipped to withstand the test of time.

# DESIGN *your* DOOR SYSTEM

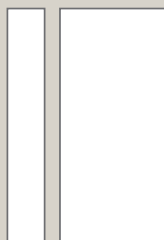

Choose a door design you'll love for years to come. The main entryway to your home provides not only a first impression to your guests but is also a focal point to your home. Exterior doors can be constructed from fiberglass or steel and customized with decorative glass and door hardware, boosting curb appeal. Choose your product and door configuration, your glass and your hardware.

## 1. CHOOSE YOUR DOOR FAMILY & CONFIGURATION

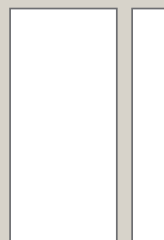

All of Madero's door components, from slab to weatherstripping, are researched and carefully selected to provide a premium quality product that withstands the Canadian climate. Entry doors are available in several configurations providing a variety of design options for your grand entrance. Choose a single or double door, or add sidelites (venting or fixed) to allow for additional light in your entry.

### Design Tip

Entrada Mahogany door systems match perfectly with full lite sidelites and/or transom with clear or white laminated glass. Add a 36" Rockwood pull with Schlage's L400 mortise lock and heavy duty roller catches to create a modern, sleek design.

Be creative. Try designing with oversized sidelites or non-traditional breaks from transom to sidelite.

## TEAK

### Teak Woodgrain Textured Fiberglass Slab

### Premium Woodgrain Composite Frame

Long praised for its natural beauty and endurance to the elements, teak has become one of the most valued wood species on the planet. This modern fiberglass teak design is perfect for contemporary or traditional design.

<b>Door</b>	Teak woodgrain textured fiberglass with composite stiles and rails
<b>Frame</b>	Maintenance-free smooth white or fir woodgrain textured composite; see page 70 for product details
<b>Sizes</b>	Widths: 3/0 only; Heights: 6/8
<b>Glass Options</b>	Glass not available with this product
<b>Warranty</b>	Lifetime limited warranty on door slab, 5 year limited warranty on components

*Modern and Retro.*

### Door Design

6'8" only

Teak  
TG99

### Design Tip

Try pairing a teak woodgrain fiberglass door slab with a smooth white composite frame, painted black. The black accent visually frames in the teak slab to provide a modern, enhanced woodgrain feature door. As well, the modern stylings of a black frame can easily match the homes exterior trim and provides an alternative to a woodgrain frame option.

*50 Series Steel Combo Storm Door System with  
Schlage Orbit Knob in Satin Nickel*

60 Series Full Vent Storm Door Paired with 3/4 Lite SteelComp Door featuring Masonite Naples Glass and Schlage Plymouth Handleset in Satin Stainless Steel

## COMBO

WOOD COMPOSITE  
STEEL FIBERGLASS

### Entry Unit plus Storm Door

#### Made for the Canadian climate

These high efficiency entry units feature a pre-mounted 1 3/8" storm door complete with venting insert. They are designed to provide a durable, energy efficient and easy to install entry solution. Madero's Combo door unit provides a higher quality solution than the typical aluminum storm door. Pair any Combo design with the Madero door system of choice. Glass insert is optional for inside door.

**Sizes** Widths: 2/8, 2/10, 3/0; Heights: 6/8 only

Available in Entrada, SteelComp, FiberComp, Premium Plus and Premium single-entry units, with or without sidelites.

and Schlage Addison Hardware in Matte Black*

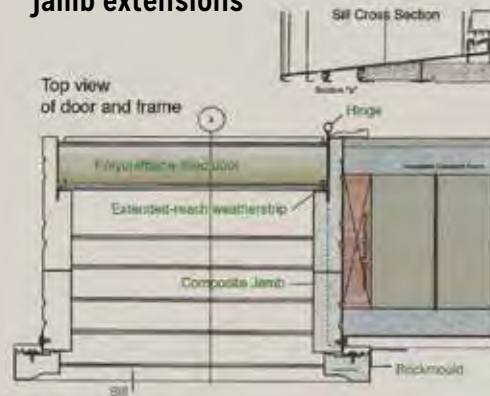

# Big Bad Jamb

## CUSTOM JAMB DEPTHS

### ➤ Size Doesn't Matter

Madero premium composite jamb depths can accommodate all wall structures, from 4" to 16" deep.

### ➤ Eliminates the need for on-site jamb extensions

*Note: Illustration shows composite jamb application. Premium wood jamb available up to 8 7/8" only.*

### ➤ Strength

#### *Fiberglass Doors*

Steel-reinforced fiberglass slabs with full height wood lock blocks and composite stiles and rails provides exceptional strength and durability.

#### *Composite Jamb*

Resilient fiber-resin compound material with high strength-to-weight ratio has twice the screw-holding power of wood.

### ➤ Energy Efficiency

A 100% CFC free polyurethane-filled door with nine times the thermal efficiency of wood; a custom-fitted jamb with a moisture tight seal for prevention of heat loss.

### ➤ Fire Resistance

FiberComp systems are available with a 20 minute label upon request.

## Why Architects Choose Madero Big Bad Jamb Systems

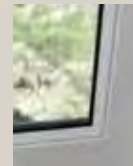

Perfect for ICF construction, high efficiency renovation, modular structures, barns, outbuildings and other commercial buildings.

*Entrada Oak Woodgrain Textured Flush Glazed Garden Doors

## Flush Glazed Doors

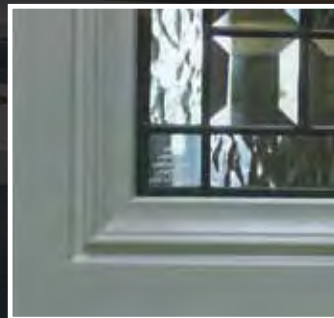

An integrated glass insert frame eliminates the need for a traditional PVC frame. This feature creates a clean, uninterrupted look. The bead is premoulded and blends with the door slab surface for a smooth seamless line.

The flush glazing keeps the door slab water and weather resistant for years to come. A removable stop allows the glass to be easily installed or replaced if needed.

Available in both doors and sidelites, smooth white and textured oak woodgrain.

## Painting or Staining Glass Frames

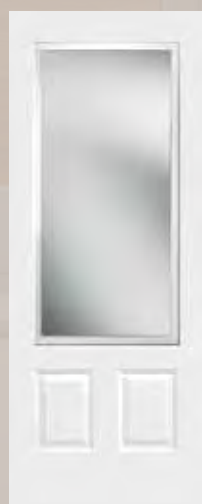

Painting or staining your window frame can provide unity with your exterior door product and reduce sight lines.

- Glass frames are available in either white or woodgrain textured material, matched according to your entry system product design.
- Woodgrain textured frames are ready to accept stain. Ideally, glass frames should be stained during the door finishing process. If finishing separately, choose a top quality exterior gel stain and apply liberally.
- Due to peeling and adhesion issues with PVC products, Madero suggests using an automotive grade paint for white frame applications. This will provide a quality product and extend the paint life of your window frame.

## CHOOSE YOUR GLASS

## CHOOSE YOUR HARDWARE

### Door Hinges

Hardware is not an afterthought, but an important design decision. Once you have chosen your door style, it is the time to give thought to what you will use for door hardware. Door hinges look their best when matched to the locksets and glass coming you plan to use. Madero's standard hinge finish is C-2G Zinc Plated, though we will change the finish based on the hardware or glass that you've chosen.

- Viewable from up to 7 feet inside your home
- Easy installation with minimal tools
- Quick, accurate and reliable identification of all visitors
- Durable and maintenance free
- DS/1000 Model: ABS Plastic body - charcoal, brass or grey finish
- DS/2000 Model: Aluminum body - gold or silver finish

*Rockwood NoirMet Architectural Pulls*

# ROCKWOOD

## ASSA ABLOY

Rockwood Manufacturing Company focuses on the design and manufacture of quality builders' hardware for commercial, institutional and luxury residential buildings. Now in its' third generation of skilled craftsman, Rockwood continues to develop new products and processes that improve their offering. Strict attention to detail from the selection of top-grade materials to the application of the finest finishes results in a tough, yet handsome product of the highest caliber.

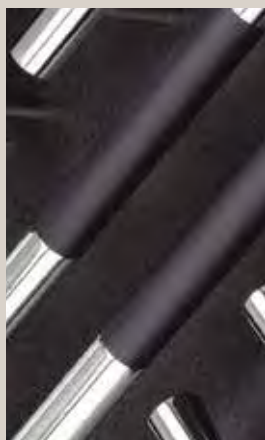

At Madero, we pride ourselves in partnering with the leading suppliers in the industry. The following Rockwood pulls will be stocked and ready within our standard lead times. All pulls will be back-to-back mounting, sold in sets/pairs, and for 1 3/4" doors only. Rockwood pulls offer a 1 year warranty.

### SoftMet™ Collection

Product #: RM2540-16, RM2540-36

ROCKWOOD

Price Level: \$\$

#### Designed for the Canadian Market

SoftMet pulls feature durable, weather-resistant black 1-1/4" diameter black Santoprene™ grips, sandwiched between metal fittings. Santoprene is a high performance engineered thermoplastic elastomer used for many consumer goods grip applications. The comfortable feel of this material is widely proven, even on cold exterior applications.

- Offset pull
- Length: 16" & 36" CTC; Diameter: 1-1/4"

MegaTek™ Door Pull and Schlage L460 Mortise Lockset*

## DESIGNER HARDWARE

### DOOR PULL ATTACHMENTS

Contemporary door pull handles make a statement in modern design – whether a subtle edge or more obvious design feature is required. Door pull handles can be fashioned in a couple of different ways; providing a sleek product which isn't only on trend but provides all the security of a handleset or lever/deadbolt combination.

Unlike a handleset or door knob unit, a door pull does not include a latching mechanism. Therefore, in conjunction with a deadbolt or mortise lock hardware a roller latch is utilized. No bells, no whistles, just functional simplicity at its finest.

#### L460 Series - Grade 1 Mortise Lock

L460 Series locks are designed for use as primary locks where no latching is required. They also offer optimum security when used as auxiliary locks in other applications.

- High-strength steel alloy cylinder retainer
- Armored front in brass, bronze or stainless steel; adjustable for door bevel
- 1" (25 mm) stainless steel throw deadbolt
- Deeper retainer groove in cylinder shell increases security against wrenching and pullout; all cylinders backwards compatible
- 6-pin Everest cylinder with patented keys standard
- Steel case and parts are corrosion resistant
- Reversible

##### Available Finishes:

C-32D  
Stainless  
Steel

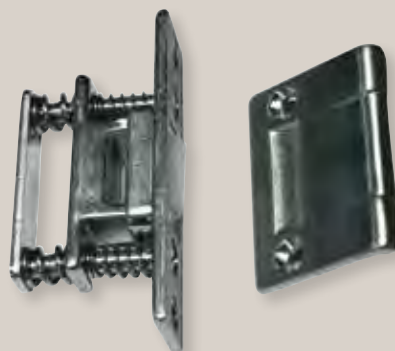

C-10B  
Oil Rubbed  
Bronze

#### RL38 Roller Latch

These heavy duty roller latches provide a strong enough resistance from roller to strike to securely fasten most door applications. Actuation is simple, closing of the door causes the roller to fall in the depression of the strike, thereby holding the door closed. The projection of the roller is easily adjusted using adjusting screws on the face of the unit.

- Maximum projection of the roller is 3/8" allowing for variance in the door clearance
- Nylon roller standard
- Stainless steel construction

##### Available Finishes:

C-32D  
Stainless  
Steel

C-10B  
Oil Rubbed  
Bronze

*Note: Some regions may require a double latching system to meet local building codes. Contact your local building inspector for more information.*

# CHOOSE YOUR **DOOR** PRODUCT

## STEEL **VS** FIBERGLASS DOOR SLAB

### STEEL DOORS

Madero's collection of steel entry door systems provides you with the perfect choice to suit your needs, from general use to high-end quality and appearance. Our steel door systems feature high definition embossing, paintable primed surfaces and the strength of internal wood blocking.

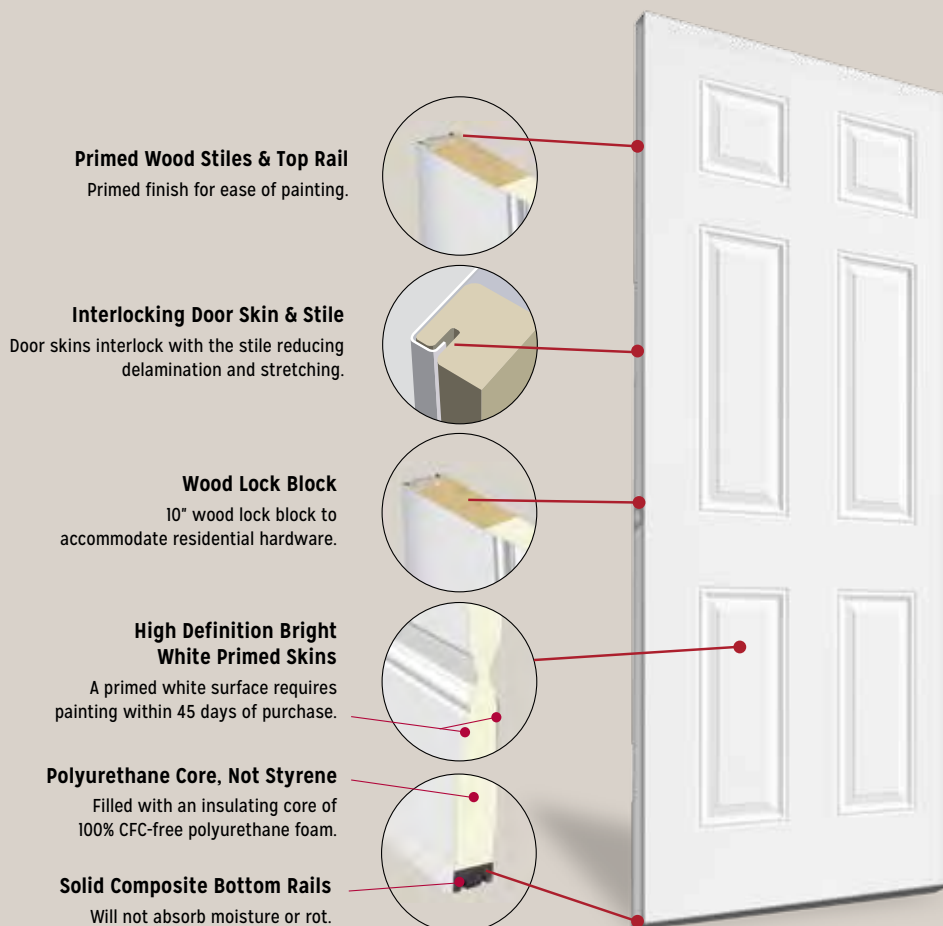

- The door skin is made with 24 gauge galvanized steel with primed steel facings and primed wood edge construction.
- Designed with a 10" wood lock block to accommodate residential hardware.
- Available in 9 high definition panel designs.
- Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

Primed surfaces  
will accept an array  
of paint colours.

**FINISHING:** A primed white surface requires painting on all six sides within 45 days of date of purchase.

**WARRANTY:** 5 year limited warranty on door, if painted.

**Primed Wood Stiles & Top Rail**  
Primed finish for ease of painting.

**Interlocking Door Skin & Stile**  
Door skins interlock with the stile reducing delamination and stretching.

**Wood Lock Block**  
10" wood lock block to accommodate residential hardware.

**High Definition Bright White Primed Skins**  
A primed white surface requires painting within 45 days of purchase.

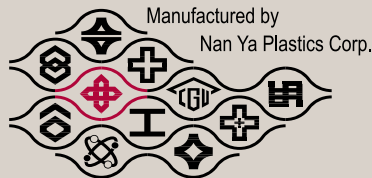

**Polyurethane Core, Not Styrene**  
Filled with an insulating core of 100% CFC-free polyurethane foam.

**Solid Composite Bottom Rails**  
Will not absorb moisture or rot.

## FIBERGLASS DOORS

In 2005, Madero partnered with Nan Ya Plastics, a world leader in the manufacturing of fiberglass, working with the Canadian Research and Development Corporation to develop a maintenance-free door slab which meets the climate conditions found within the Canadian market.

- Pre-pigmented white or textured woodgrain fiberglass does not require paint or stain, will not discolour and withstands everyday wear and tear. Though paint/stain is not required, these door slabs can be finished to match your home's unique design and style.
- All fiberglass door skins are made from impact-resistant fiberglass and are compression moulded to offer highly detailed panel definition.
- Door slabs are filled with an insulating core of 100% CFC-free polyurethane, providing a higher thermal efficiency than steel and offering a door slab that is temperate to the touch.
- Fiberglass doors will not dent, expand, contract, bow, warp or twist.

**WATERPROOF:** The stiles and rails are composed of water resistant polymer. With no exposed wood, water absorption is eliminated.

**WARRANTY:** 25 year limited warranty on door slab. No painting or staining required.

**Exceptional Security**  
Our full length steel reinforced wood lock block offers exceptional security while allowing a range of hardware mounting options.

**Energy Efficiency**  
Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

**Strength**  
A steel reinforced core creates a rigid internal structure that prevents bowing and warping in extreme temperatures.

**Beauty**  
Deep embossed panels create beautiful crisp lines and deep shadows that are resistant to dents, dings, splintering, and corrosion.

**Completely Waterproof**  
Our full length composite stiles and rails provide complete waterproofing for the door's insulation. These stiles will not splinter like wood or delaminate like steel.

**Smooth White Option:**

Smooth Skin

**Textured Woodgrain\* Options:**

Rustic Mahogany

Teak

Fir

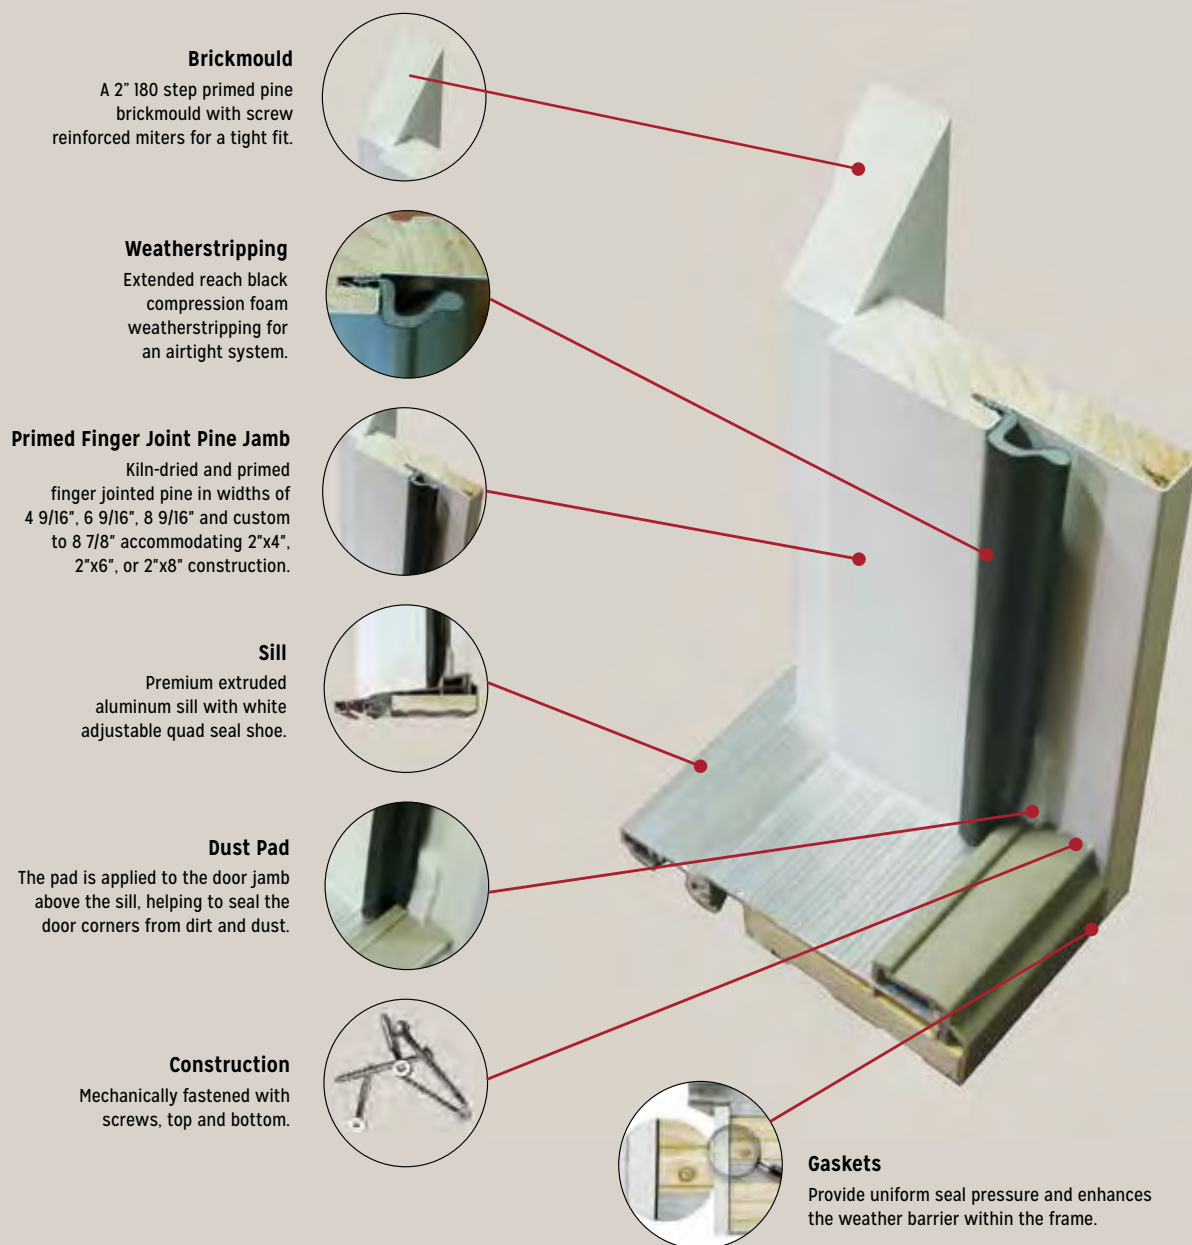

Oak

\* samples shown stained. Actual product is sold in its' natural almond state

# CHOOSE YOUR **FRAME** PRODUCT

## WOOD **VS** COMPOSITE FRAME

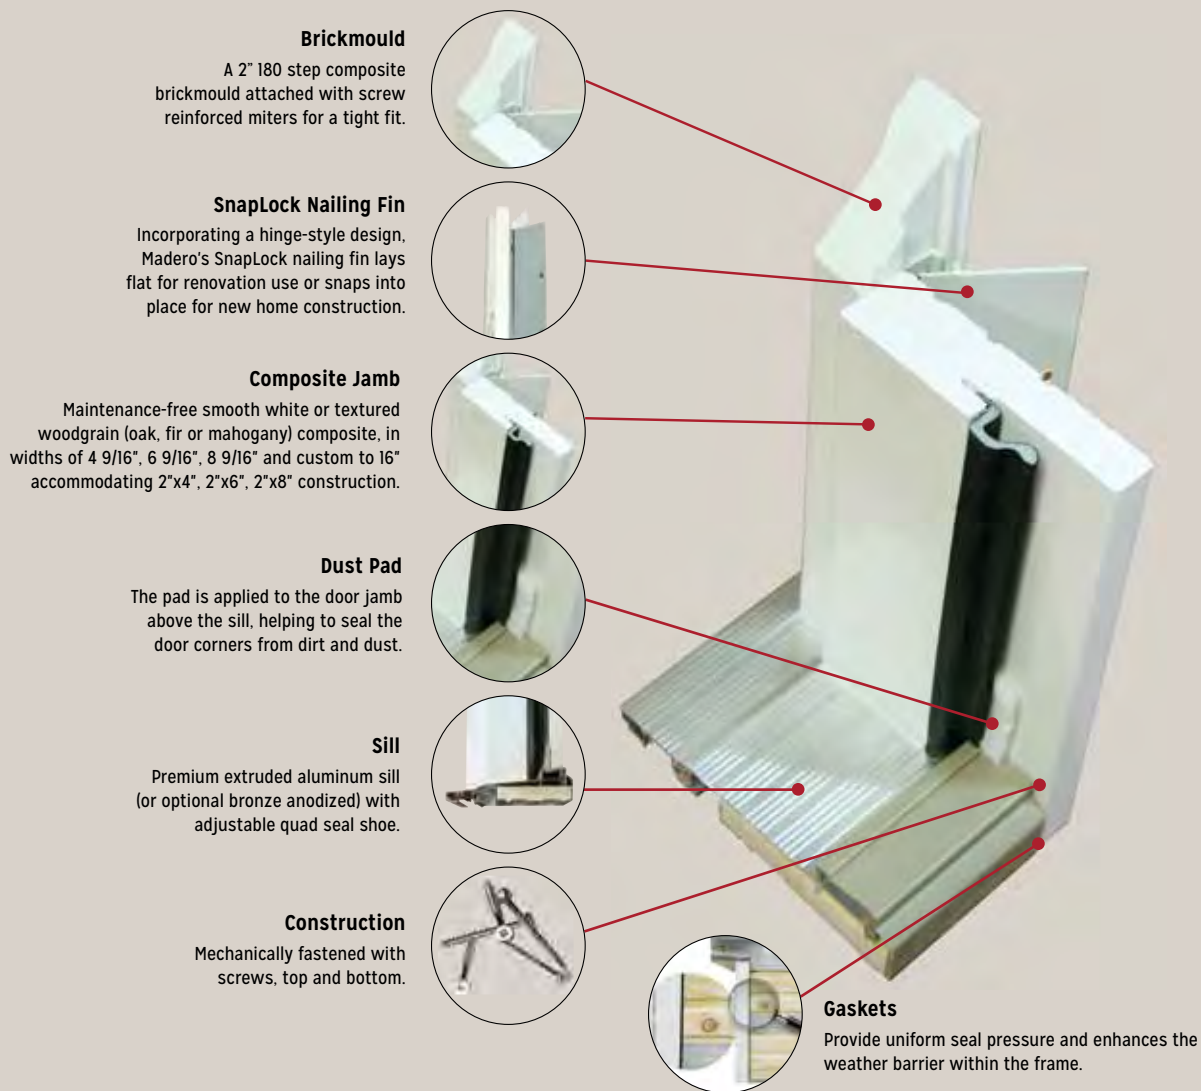

## PREMIUM WOOD FRAME

Madero's premium wood frame is constructed of kiln-dried and primed finger jointed pine, mechanically fastened with screws for superior holding power. In addition, premium frames include an extruded aluminum sill with white or brown adjustable quad seal shoe, extended reach weatherstrip, gaskets and silicone –

providing additional protection from the harsh Canadian environment. This durable product provides ease of installation and on-site damage repairation while offering an economical, environmentally sustainable choice.

Madero's premium wood frames – traditional design with the tried and true benefits of natural wood construction.

## PRODUCT SPECIFICATIONS

## PREMIUM COMPOSITE FRAME

In 2005, Madero partnered with Nan Ya Plastics, a world leader in the manufacturing of fiberglass, working with the Canadian Research and Development Corporation to develop a resilient full length composite door frame. Maintenance-free smooth white or woodgrain composite offers all the strength and convenience of wood with enhanced properties, providing a moisture and damage resistant product suited for the Canadian climate.

Complete with ball bearing hinges, a premium extruded sill, composite brickmould and SnapLock nailing fin, these waterproof, maintenance-free composite frames will not discolour, absorb moisture, splinter, or rot.

Though machined with the same process as traditional wood door frames, solid composite provides twice the holding power of wood. While similar door frames may crack or bow under the intense cycle of the Canadian climate, Madero's composite door frames have proven to stand proud against the test of time.

Research shows that in most forced entry situations, door system failure lies within the frame, not the door slab. Our composite frame will not splinter or crack, providing a virtually indestructible product and reducing forced entry concerns.

Madero's premium composite frames – an innovative alternative to traditional wood frame construction.

and Schlage Venice Handleset in Satin Nickel*

# WHAT TO KNOW *BEFORE* YOU ORDER

Before you can order your door system, you'll need to understand common ordering specifications including proper measurement techniques, door swing and handing as well as machining for specific hardware applications.

## HOW TO MEASURE

Purchasing a replacement exterior door requires several measurements of the door opening to allow your new door to fit within the existing space. The door itself may shrink or swell over time and may not fit the original measurements. Taking precise measurements enables a homeowner to choose a replacement door that will require few adjustments.

### How to measure for replacement exterior doors

1. Gently pry off the interior door trim. Clean out and remove any insulation from the original prehung system.
2. Take horizontal measurements in three places on the width of the rough opening (top, centre, and bottom) – from one edge of the frame to the opposite width of the frame. The rough opening is the gap between your door jamb and the inner edge of your wall or drywall.
3. Take vertical measurements in three places (left, centre, and right) from the edge of the header stud down to the bottom of the door sill or threshold.
4. Measure the thickness of the door jamb to determine if you require 2"x4" (4 9/16"), 2"x6" (6 9/16"), 2" x 8" (8 9/16") or custom jamb construction.

### Tips & Warnings

Over the years, traditional sizes and measurements for construction have changed. Therefore, it is important to measure your door width and jamb depth to ensure you have a product available to meet your required space. If a custom jamb depth is required, please specify the extended frame option, available on page 26.

It is also important to note that older doors that need replacing may have changes in their original size from weathering. Doors that warp or do not have adequate sealant for protection can either shrink or swell in size.

## WHAT TO KNOW BEFORE YOU ORDER

### 2. DETERMINE YOUR PRODUCT SIZE

Many Collection Series doors are available in 2'8", 2'10" and 3'0" widths with 2"x4" (4 9/16"), 2"x6" (6 9/16"), 2"x8" (8 9/16), or custom construction, left hand or right hand application and inswing or outswing.

#### SINGLE DOOR UNIT SIZING

Inswing	Slab	Net Frame	Rough Opening	OSM Brickmould	Outswing	Slab	Net Frame	Rough Opening	OSM Brickmould
2/8 x 6/8	31 3/4" x 79"	33 7/16" x 82"	34 7/16" x 82 1/2"	36" x 83 1/4"	2/8 x 6/8	31 3/4" x 79"	33 7/16" x 81"	34 7/16" x 81 1/2"	36 15/16" x 82 1/4"

3/0 x 6/8	35 3/4" x 79"	74 1/4" x 82"	75 1/4" x 82 1/2"	77" x 83 1/4"

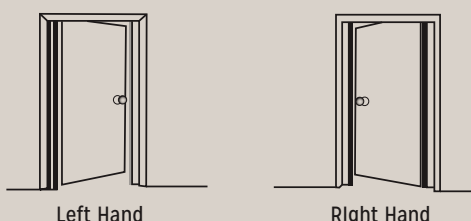

## 3. CHOOSE YOUR DOOR SWING / DOOR HANDING

Doors are available as inswing or outswing models. This refers to which way your exterior door will swing; outward (toward the outside of the house) or inward (toward the inside). Most homes are built to accommodate inswing doors, however, your entry door can be designed to swing outward if preferred.

Door handing refers to the direction that the door swings. When viewed from the outside, if the hinges are on your left side and the door is pushing away from you, it is a left hand (LH) inswing. If the hinges are on your right side and the door is pushing away from you, it is a right hand (RH) inswing.

### INSWING

Doors pictured above assume you are standing on the outside of the building.

### OUTSWING

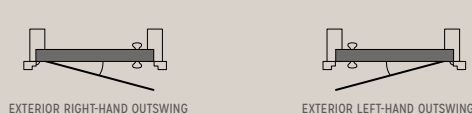

Doors pictured above assume you are standing on the outside of the building.

### 4. HARDWARE SPECIFICATIONS

Different types of door hardware require different machining methods; from single drill to double drill and custom. The following is a quick list to help provide some guidance when ordering.

- **Single Drill:** Single lever or knob style hardware
- **Double Drill:** Handleset, lever or knob with deadbolt hardware
- **Custom:** Mortise lock, roller catch or multipoint hardware

If you plan to use hardware which is not offered by Madero, please specify the hardware style and provide a template for machining purposes.

### 5. SIDELITES: ACTIVE/VENTING VERSUS FIXED

Active / Venting Sidelite

Fixed Sidelite

### 6. DIRECT GLAZE: SIDELITES & TRANSOM

Design your entrance with grand appeal and open your rooms to a flood of light from the sidelites and transom. Direct glaze sidelites and transoms provide full unobscured glass coverage, allowing sunlight in and brightening your entryway. Madero offers two modern choices, clear or white laminated. White laminated glass combines a satin finish with a neutral, translucent appearance. It filters light, smoothes visual contours, and provides obscurity and privacy.

*At Madero, the sky is the limit.*
