OPENING DOORS

ASSA ABLOY, the global leader
in door opening solutions

Studio collection™

The Studio Collection from SARGENT features superbly styled door trim available in a broad array of designs and finishes. This collection enables inspired design professionals to incorporate their aesthetic vision into any opening, allowing a consistent appearance regardless of the door's function.

OPENING DOORS | Distinctive, superbly styled architectural hardware.

Studio Collection trim is compatible with SARGENT commercial-grade mortise and tubular locks, electromechanical and access control locks, exit devices and master key systems in a variety of applications.

Design In Synch:

Good design won't stop at the door. With SARGENT Studio Collection levers, architects and interior designers can create a harmonious balance of beautiful design and function. This design continuum allows one lever style to be carried across all product lines to any door opening in a building.

Unlock the possibilities.

One lever,
every opening.

Tubular Lock

For interior doors in hotel guest rooms, high-end apartments, condominiums and office buildings, the DL Series tubular lock is the answer. With its solid feel and smooth performance, the DL Series will exceed expectations.

Mortise Lock

Looking for a high-use, secure lock without compromising on design? Then SARGENT 8200 mortise locks are the answer. Whether it's for healthcare buildings, school and university applications or government facilities, this lock gives you the security, strength and aesthetics that you require.

Exit Device

Simplicity, strength and durability are a few things SARGENT 80 Series exit devices bring to the door. Push bar on one side, beautiful lever on the other, these exit devices are the ideal choice for egress doors in applications such as theaters and conference rooms.

Access Control

High security has never looked this good. Available on mortise locks or exit devices, the SARGENT line of access control products are easily integrated into most access control systems and are the aesthetic choice for corporate institutions, healthcare facilities or any door that requires electronic security control.

Campus Access Control

A solution that integrates into existing campus software? It doesn't get any better than that. The SARGENT Passport 1000 Series allows the same card to open a dorm room and buy lunch at the cafeteria – the possibilities are endless.

Simpli™ Unique

This roseless trim by SARGENT seamlessly unifies the lever and the door. Compatible with most Studio Collection decorative levers, Simpli creates a flawless aesthetic vision on any door opening.

Door hardware is necessary, but doesn't need to impose. Select a distinctive decorative lever and a beautiful finish to form a stunning continuum of design with Simpli.

- One lever on all openings creates a consistent theme throughout your building.
- Variety of decorative levers to complement your design.
- Maiman and Graham wood doors, Ceco Door and Curries metal doors can be expertly prepared for Simpli trim.
- 14 architectural finishes available including MicroShield® antimicrobial coating.

UNDERSTATED | ELEGANT | DISTINCT

Specifications
