

## *ND-Series*

*Customer approved  
and built to last.*

The ND-Series has long been one of Schlage's best selling mechanical locks for good reason - it's tough, durable and fits a wide variety of applications.

Now we've made our trusted ND-Series lock even better by making it easier to install. We've added these enhancements because we know that a lock installed correctly the first time will last longer and perform better. And the longer the lock lasts, the lower the cost of ownership over the life of the lock.

We've also beefed up our warranty to provide 10 years of coverage. The result: greater peace of mind that every door is safe and secured with a lock built to last.

## A simpler, smarter ND-Series lock.

**Optional Vandlgard® lever** protects against damage from excessive force and vandalism

**Anti-rotation plate** snaps into place, making installation easier

**Built-in durability** exceeds ANSI/BHMA Grade 1 cycle test requirements

**Visual chassis-to-door alignment** via notched yellow gauge is embossed with door thickness, taking the guesswork out of installation by providing visual and positive "stop" for door size adjustment

**Greater lever-to-spindle engagement** soft spacer added to spindle makes the lever feel more "snug" out of the box

**New lever removal tool** is bigger, stronger and designed to work with Schlage ND- and L-Series locks. Sold separately.

### Door Reinforcement

A reinforcing unit is available to reinforce and help prevent the collapse of hollow metal doors when locksets are tightly mounted. The unit works with both 1 3/8" and 1 3/4" thick doors.

### ND-Series Continuous Improvements

#### Bridge slide provides greater durability

In 2010, we redesigned the bridge slide in order to improve the locks overall durability. The bridge slide prevents components from binding and provides greater spring retention.

#### Stronger locking lug and key cam

In 2009, we also improved the locking lug and key cam. The locking lug and key cam are stronger and more resistant to damage than the previous design.
